SUMMARY

I've built data and reporting products in regulated environments that replace manual workflows with self-serve tools. At BMO, I redesigned a failed risk pilot into a **250+ user** platform that cut executive reporting requests by **60%**. Pre-BMO, I built a national education program with Google from business case to **5,000+ learners**.

RELEVANT EXPERIENCE

Bank of Montreal *(North America's 7th largest bank, $1.5T in assets)*

Agile Delivery Lead, Risk Technology Group *2024 – Present*

- Restructured planning and dependency management across a **10-squad** regulatory program. Product throughput increased **~25%** (50 to 63 items/sprint); unplanned work dropped, making roadmap commitments reliable for stakeholders.
- Rebuilt a blame-driven team culture into one that owned its commitments. Earned the portfolio's highest agile maturity rating and satisfactory audit ratings.

Solution Architect, Risk Technology Group *2021 – 2024*

- Expanded FRTB risk decomposition from single-layer instruments to multi-layer structures (funds of funds), directly reducing regulatory capital requirements. Mapped front office workflows and translated them into specs for **six delivery teams**.
- Diagnosed and resolved broken product decisions on a **$20M+** regulatory program. Created cross-functional Design Authority sessions that resolved **10 critical trade-offs** across risk, front office, and technology.

Product Owner, Technology and Operations Risk and Internal Controls (TORIC) *2019 – 2021*

- Inherited a failed risk reporting pilot. Ran persona-based discovery, found executives resisted because the tool surfaced issues they'd have to defend. Redesigned it as a self-serve platform with transparent risk thresholds. Grew to **250+ users**, cut reporting requests by **60%**, freed **~$200K/year**.
- Designed persona-based onboarding anchored on 'what's in it for you' messaging per user group. BAU support requests dropped **50%**.
- Shipped MVP with a two-person team. Validated with early adopter champions before scaling to the full user base.

Lead Business Analyst, Technology and Operations Risk and Internal Controls (TORIC) *2017 – 2019*

- Built the risk KPI data warehouse from scratch across **5 business areas**. Reduced manual data prep by **30%**. This became the data foundation for the TORIC platform.

UpGrad *($2.25B edtech unicorn, online higher education across 10+ countries)*

Product Manager, Android Development Program *2016 – 2017*

- Built the business case from market research and P&L modeling. Secured Google as a partner (one of six in India) and recommended the launch.
- Owned all product decisions: curriculum structure, pricing, class size, sync vs. async delivery, and mentor network. Scaled to **5,000+ learners**.
- Recruited mentors by selling them the program vision. Built the human infrastructure that made the learning experience work.
- Sunset the program when completion and placement rates fell below threshold. Presented the case to leadership with a transition plan for enrolled learners.

EARLIER ROLES

Aspiring Minds *(AI-powered talent assessment platform, 3,000+ clients globally, acq. by SHL for ~$100M)*

Product Consultant *2012 – 2015*

- Drove product adoption for an NLP-based assessment tool by embedding at client sites and reframing the product from 'job automation' to 'expertise amplifier.' Contributed to **$2M+ in enterprise contracts** across Southeast Asia.

Get Set Sorted *(Career guidance platform for high school students using psychometric assessments)*

Co-Founder *2015 – 2016*

- Co-founded a career guidance platform that reached **2,000+ students** across **20+ schools** in 12 months. Built a mentor network of **100+ professionals** and raised seed funding from India's largest social impact fund.

EDUCATION

Faculty of Management Studies (FMS), University of Delhi, India
MBA – Top 5 business school in India; 1:450 selection ratio (220 students from 100,000+ applicants)

Netaji Subhas Institute of Technology (NSIT), University of Delhi, India
